Professor Seeley's "Ecce Home " was pub-and in 1865, and before the following year was ended and reached a tenth edition.

The two parts of Mr. Philes's "Odell Cata-

logue," with prices entered, were sold at Bange & Co.'s last week for \$5 50. They were published at \$4.

Farrar's "Life of Christ" has been translated into Russian, and nearly all the bookstalls in Moscow have it for sale. The price asked for it is equivalent to \$1 25.

Mr. Swinburne's new volume of poetry, 'Songs of the Spring-tides," will be ready at R. Worthington's this mouth. It includes the ode to Victor Ruse. In a reference to an English book, the in-

iccuracies of which, it says, are "multitudinous," The Proceeder cites that the suther, instead of saying "Mr. Sarraway, a felloonger in Broadmead," said "Mr. Sarraway, a felloonger in Broadmead," said "Mr. Sarraway, a felloonger in Broadway,"

Arrangements with Nordenskjöld for the publication of the narrative of his Arctic voyage have been made by Macmillan & Co. The publishers will now bring out, and this very soon, a memoir of Francis Beak, the Hangarian statesman.

The forthcoming and seventh volume in the series of "Knickerbocker Novels" is "Uncle Jack's Executors," by A. L. Noble. It will be ready soon. "The Leavenworth Case," which was the first of this series, is still one of the most popular. W. O. Stoddard's "The Heart of It" is in its second edition.

Meart of It" is in its second edition.

An important political work by Louis Kossuth will soon be published in London by Cassell, Petier & Galpin. Its chief interest is said to lie in that it gives the secret treaty and details of the understanding between England, the Emperor Napoleon and Count Cavour during the period of the establishment of the Italian Kingdom.

Harper & Brothers announce "The Land and the Hook," by William M. Thomson, D. D.—a large volume on the Holy Laud, consisting of Biblical illustrations drawn from the manners, customs and scenery of Southern Palestine and Jerusalem. It has 140 illustrations and maps, and comprises nearly 700 pages. Dr. Thomson has been for forty years a missionary in the lands of which he writes.

Not only is there an autobiography of Heine in existence, but there are said also to be other writings of his that are unpublished. A lady in Berlin possesses a manuscript in which he continues the "Reise von Minchen mach Genua," some parts of which were used in "Die Stadt Lucea," where he ascribes to "Mylady' certain uterances that in the original appear to be the direct expression of his own opinions.

Few guide books to Europe are better known to the average tourist-particularly to the one who makes a tour out of his few weeks' vacation-than "The Satchel Guide," published by Houghton, Osgood & Co. Its editor, since he prepared the edition now in print, has made an extensive tour of the countries covered by the volume, and the results of it have been incorporated in the new edition, which is to be make its appearance

Marion Harland's new book is neither a cook book nor a novel, but a volume of travels in Europe. It has the title "Loiterings in Pleasant Paths," and is "the truthful history of the foreign life of an American family whose main object in going on a pil grimage was the restoration to health of one of its mem-bers." Charles Scribner's Sons will publish it next week. They will also publish then Mrs. Burnett's "Louisians."

Edwin Arnold has written a second letter to I. K. Fuck & Co. about the publication by them of au edition of his "Light of Asia." He says: "You must please not understand the note which I recently ad dressed to you as authorizing any issue of my book which would interfere with the fair interests of Messrs. Riberts Bros., of Boston, to whose initiative 'The Light of Asia' owes so much of its popularity in America. I desired merely to acknowledge the compliment paid, and to beg that my name might be correctly printed as Edwin, not Thomas."

The world is likely soon to see some new thing from the pen of the Duc de St. Simon, the famous memoir writer of the age of Louis XIV. In his capacity as Ambassador to Spain in 1721, St. Simon kept in his own hands a number of documents concerning his own personal history and the foreign relations of his coun-try. Hitherto the new editor of the memoirs, M. de Boilisle, has failed to get permission to consult these
St. Simon papers, which are preserved in National archives; but one of the first acts of the present Administration has been to grant him access to the papers, so that he will beneforth be able to work undisturbed at a complete edition of the memoirs.

The chances of an auction-room are proverbial, and in book sai's this Spring there have been several remarkable instances of the uncertainty of prices, even with books supposed to have a fixed value. Last week a copy of Parchas's "Pilgrimes," wanting one of the original maps, a title page, several pages of the text, and in other ways imperfect, sold atl Hange's for \$165. Another copy of the same book—and see whole believed to be a better copy—sold at the same place a few months earlier for \$20. In the first case the work was sold with a very desirable collection of other books, many of them Americana, and Mr. Joseph Sabin sat in the pulpit; while in the other the library was a miscellaneous one, in which there was no special interest. At Clinton Hall, about three weeks special interest. At Chiton Hall, about three weeks since, a large paper copy of Mr. Sabin's "Dictionary of Books Relating to America," in forty-five parts, was bought for \$11.25. It was published at \$150. Again, at Bange's last week two persons bangened to want a second-hand copy of Hawtherne's "House of the Seven Gulles" in the old brown cloth style. It was knocked down at \$1.60. A Nassau-si, dealer does not expect to get over 50 cents for it, and will sell the work new for \$1.20.

MINES AND MINING.

TUBSDAY, April 13-P. H. In the mining share markets, while depression continues to be the ruling feature, there are not wanting indications that a sharp reaction is near at hand. To-day it was a break in the price of Chrysolite from 22 to 19@19% that gave to the whole market a heavy tone. But the Comstock shares were steady or strong, Consolidated Virginia rising from 2.90 to 3.30, and California from 2.60 to 2.85@2.80. Hukill was firm at 2.20@ 2.30, and Leadville, after a further decline to 2.35, rallied to 2.50. Bodie was in demand at 812, and rallied to 2.50. Bodie was in demand at 8½, and Bulwer at 7@74. Green Mountain being strong at 8.25. South Hite declined from 1.65 to 1.40@1.45, and Moose was steady at 1@1.05. Among the low-priced stocks, Buckeye, after a rally of 2 cents to 53, fell to 51, South Bulwer rose from 51 to 56, and South Bodie from 25 to 35@30. Calaveras sold at 87@85, Rappahannock at 26@27, Lacrosse at 46@ 3@44, and Great Eastern at 44@48. At the Stock Exchange Climax was 's lower at 25s. Little Pittaburg 's lower at 6%, Standard 's lower at 30%, and Silver Cliff sold at 4%. The movements, however, were of a character that indicated dulness rather than weakness.

-	The following disp:	atch	from Denver further	CX-

The following dispatch from Denver further explaining a telegram which appeared in The Themung vesterday, has been received at the office of the Ball Dominec Company in this city: "S. C. Schaffer's application for an injunction and receiver of the Ball Dominec Company in this city: "S. C. Schaffer's application for an injunction and receiver of the Ball Dominec mine was overruled by Judge Hallett, after full argament."

Messrs. Lounsbury & Haggin yesterday received \$100,000 in gold bars from the Homestake, Deadwood and Golden Terra mines.

The superintendent of the Standard telegraphed, April 12: "Struck ledge on 700-foot level, 300 feet east from shaft. In seven feet, but not yet through ledge. Mine looks better throughent. News from Bodie more encouraging to-day." This news is confirmatory of previous dispatches.

The Sir Roderick Dhu office yesterday received from the mine a gold bar weighing 477 onnees.

The committee appointed on Monday afternoon by the American Mining Stock Exchange, to report on stocks and securities, met yesterday afternoon in the Exchange Board Rooms, No, 115 Broadway. Mr. Washington Lee was elected chairman of the committee, and Mr. W. F. Moller secretary. On motion, the Chair appointed Messrs, Shinn, Orvis and Moller to draft a circular to be sent to the different mining companies, regarding the listing of their stock upon the Exchange. The committee will meet again to-day at 3 p. m.

The tunnel in the Colorado Prince, Leadville, started at a depth of 189 feet, to connect with the mill at the surface, is being driven as rapidly as possible. It is running in the same quality of rich ore found in the crosscuis and levels at 80 and 155 feet in the main shaft. It was estimated that the company had 35.000 tons of ore exposed above the 155-foot level. All the lower workings are in in even richer ore.

Work on the Berry shaft of the May Flower Control of the control of the

company had 35.000 tons of ore exposed above the 155-foot level. All the lower workings are in in even richer ore.

Work on the Berry shaft of the May Flower Consolidated has been temporarily suspended in order to push more vigorously the drift at the first level, which is to unite with the winze from the tunnel. Drifting is also being carried on from the winze toward the main shaft. The distance separating the faces of the two drifts was at last reports about 170 feet. The ledge in the drift at the bottom of the winze is from three and a half to four feet wide, and averages about \$70 per ton. When the connection is made, the company will at once begin stoping in order to pay dividends. They cannot now hoist from the bottom of the winze economically, but can from the main shaft when the desired connection is made.

The Superintendent of the Jett Consolidated Silver Mining Company, Nevada, reports that the sinking on the main incline of the Centennial lode had been reaumed in ore averaging \$100 per ton. The incline is down 100 feet, and work is now being pashed on the second 100 feet. Drifts have been started east and west from the first level, to test the permanency of the ore-body encountered in sinking. The Idlewild Tunnel is in 100 feet, the vein at this point being five feet in width.

The Superintendent of the San Antonio, Nevada, reports, under date of April 2, that the crosscut on the 450-foot level was in fifty feet. Seams and pockets of fine ore, both chloride and sulphurets, had been cur, the whole appearance being very encouraging. As soon as the steam hoisting works, which are now at the mine, are erected, a full force will begin drifting and crossentting on the different levels. Stopping ground is being rapidly opened up.

The Stormont Company received over \$38,000 in believel lest month the product of ten stanue for

ent levels. Stoping ground is being rapidly opened up.

The Stormont Company received over \$38,000 in bullion last month, the product of ten stamps for twenty-nine days. The superintendent telegraphed April 12: "Shipped \$6,587; stopped one day to put in self-feeder; all well."

A new seam of low-grade ore has been struck in the Banker shaft of the Big Pittsburg.

The Superintendent of the Robinson Consolidated writes under date of April 5, that the north and south stopes were producing fine ore. A stoping drift had been started in the block of ore between crosscuts Nos. 2 and 3 south. The face of the main incline was in 328 feet in good ore; the tunnel was in 297 feet. A heavy snow storm had stopped outside work.

crosscuts Nos. 2 and 3 south. The face of the main incline was in 297 feet. A heavy snow storm had stopped outside work.

The face of the new 4th-level drift in the Iron Silver was all in mineral on April 7. The west drift in the Bull'seye showed 5 feet of fine ore, and the south drift in the Stone 4 feet of ore. The ore bins were full to overflowing; shipments to April 7, 502 tons.

In the bottom of the Daly shatt of the Little Chief bunches of galena were struck on April 6. This indicates a continuance of the ore body from the older workings in the muse. The north drift from shaft No. 4 was two-thirds in fine sand carbonate. Shaft No. 7 showed fine ore in both the north drifts. Total adipments April 1 to 6, 453 tons.

On April 6, the main tunnel of the Boulder Consolidated was in 475 feet. The sinking of the main shaft, now 75 feet down, to the tunnel level, will be begun as soon as the weather permits.

Most of the ore faces in the Chrysolite continued in hard blasting rock on April 6. The ore in the drift east on "Section A, 29," before only in the bottom, covered the entire face. All the winzes were being hurried downward to the new level. Shipments April 1 to 6, 533 tons.

Letters received vesterday from Globe District, Arizona, by General Fisk, state that the main shaft of the Golden Eagle was constantly developing rich ore, the ledge widening every hour. The machinery for the stamp mill had arrived, and was to be erected as soon as possible. The Silver Era mill was to have been started on April 2. A fine body of ore had been developed in the main shaft of this mine at a depth of ninety-three feet. All the workings in the Mack Morris were looking "exceedingly well." The bonanza in the castern shaft continued to increase in width and richness. The Arizona Mexican mill will start on April 15.

The Durango Company have received from the Union Pacific Express Company have received from the Union Pacific Express Company the full value of the \$7,000 gold brick atolen by robbers at Sidney a few weeks ago. The c

world that has ever produced the amount of ore yielded by the Little Pittsburg during a period of eighteen months, with the exception of the Comstock, in Nevada. There is no doubt that after taking from the mines such immense quantities of ore, it is tired and needs reat; but that it he mine a read that is a statement that is absolutely false. The yahoo who stated that he went through the mine, and telegraphed to New-York that its resources were all taken out, states a lie. He never was through the mine or any part of it. And I say here to-night, in considering Leadville's future, that you or I will not live long enough to see the lattle Pittsburg or any of the great mines of this camp exhausted.

A General Press dispatch says; "Considerable

A General Press dispatch says: "Considerable excitement prevails in White Co., Ga., over the finding of rich pockets of gold in Naccochee Valley. Over 100 nuggets were taken out in four days, one of which, shown in Atlanta to-day, weighs over one pound. The yield grows richer as the washing proceeds."

Saunders, Montana.

This company owns the largest Reduction Works in the Territory, and eleven mines in the immediate vicinity, whose ores they are reducing to buillon. Their mines are on mountain sides, cosily developed by tunnels without the use of hoisting or pumping machinery. These new aggregate 2,400 feet in length, all in ore. The votus average five feet in width: the ores assay from 60 to 250 nunces per too. About 10,000 toos are on the dumps and at the mill. The Company offers a limited number of its shares at \$2.75 per share.

The stock speculation to-day opened depressed and prices generally showed a further decline. But

after midday a better feeling seemed to provail, and a sharp rally followed which caused the final gains to exceed in number the final losses. The busi-ness for the day was 372.973 shares against 391,770 yesterday. New-York Central, with sales of ouly 10,000 shares, was active; opening <sup>1</sup>2 per cent lower at 131<sup>1</sup>2, it declined to 129<sup>3</sup>4, and recovered to 132 at the close. It was a new sensation in the loan market to hear persons offering to loan Central and Hudson stock, and one that has hardly been experienced before in the last tive years. But it appears that only a part of the borrowed stock was returned to-day, although the syndicate made its full deliveries. The part of the stock which was not returned probably was withheld for speculative effect, as some of the persons who have the stock and owe it to the street suddenly appeared as loaners of money.

Eric was particularly active, the sales of its

amounting to 65,800 shares, and its price, after falling from 4258 to 42, rose to 43792435. Lake Shore was more active than on Momday, fluctuating be-tween 1061s and 1072, and closing at its highest figure. The coal stocks were prominent in the dealings, being among the weakest stocks in the morning and among the strongest in the afternoon. The only active stock of the grangers was St. Paul, which yielded from 81 to 70<sup>1</sup>g and recovered to 80<sup>2</sup>g 80<sup>5</sup>s. The Wabashes, Hannibal and St. Joseph, and Missouri. Kansas and Texas stocks were very much depressed early, but in the late
